

# LIFE: A JOURNEY THROUGH TIME

---

A hands-on Science camp for curious minds! Full of exciting history lessons, science experiments, and art activities, in this camp experience students will travel through time from the dawn of life to the earliest humans. Starting with the Precambrian Time, we will learn about life forms that evolved, adapted, and were wiped out (or survived). Students will make projects to bring home as well as collaborate on exhibits for our Museum. A Parent Expo at the end will give us a chance to show off all we've learned. This is a camp your child will never forget!

## CAMP DETAILS

---

campers age 7 - 12  
Monday through Friday  
9 am - 3 pm daily
